- Networking

PROJECTS

Netflix Clone(Link)
- Used **HTML 5**, **CSS 3** and **BootStrap 4** to design the Front page of the Netflix clone.
- Used **React.js & JavaScript(ES6)** to design different components.
- Made extensive use of **Movie DB API** to render the images and trailers
- Used **Firebase** to host the website

Full Stack ToDo List (Link)
- Used **HTML 5**, **CSS 3** and **BootStrap 4** to design the Front page of the TodoList.
- Used **Embedded Java Script** to render the pages with the same design and similar content
- Used **Node.js** and **Express.js** to write the backend and connect to the servers
- Used **MongoDB(NoSQL)** and also integrated features and functions of **Mongoose** to persist the user entries to the ToDOList.

Newsletter Sign Up WebApp (Link)
- Used **HTML 5**, **CSS 3** and **BootStrap 4** to design the Front page of the Newsletter.
- Made extensive use of **MailChimp APIs** to record all the audience details of my newsletter
- Used **Node.js** and **Express.js** to write the backend and connect to the servers
